SUMMARY

Senior frontend engineer, 6+ years building fast, accessible, pixel-accurate product UIs in React and Next.js, with working depth in Angular 16 and Vue.js. Specialized in design-to-code and design systems — component libraries, CSS token architecture, responsive layout, state management, and performance. Experience spans the neeto SaaS suite and client work at BigBinary plus enterprise education platforms, working closely with designers and QA in Agile teams.

SKILLS

Languages	JavaScript (ES2023), TypeScript, HTML5, CSS3
Frameworks	React.js, Next.js (App Router, RSC), Angular 16, Vue.js
UI & styling	Tailwind CSS, Material UI, Vuetify, SCSS/Sass, Bootstrap, responsive and fluid layout
Design systems	Design tokens and CSS variables, component libraries, variants and states, Storybook, Figma, Zeplin
State & data	TanStack Query (React Query), Redux Toolkit, REST APIs, Axios, context/reducer patterns, chart and data-visualization UI
Testing & quality	React Testing Library, Lighthouse, cross-browser testing, debugging
Accessibility	WCAG 2.1 / 2.2 AA, semantic HTML, ARIA, keyboard navigation
Performance	Core Web Vitals, code-splitting, bundle analysis, React Profiler, render optimization
Tooling	Git, GitHub, Vite, Webpack, GitHub Actions (CI), VS Code, Chrome DevTools, Agile/Scrum, Jira

EXPERIENCE

Senior Frontend UI Developer HubbleHox Pvt Ltd — Mumbai, India <i>Hubble VLeap — a scalable LMS for course/program management, assessments, certifications, webinars, learner engagement, and analytics across B2B, B2C, and government. Also: Academic & Non-Academic Survey apps, Smart Staff Selection.</i> - Collaborate with product designers in Figma — review designs, give feedback, and translate them into pixel-perfect, responsive UI in React, Angular 16, Vue.js, and Tailwind. - Built a reusable CSS token and variable layer from the style guide (color, spacing, type), replacing ad-hoc styles and standardizing consistency and responsiveness across all four applications. - Rebuilt the Hubble VLeap LMS front end on a fully responsive, component-driven architecture, improving usability across desktop, tablet, and mobile. - Adopted TanStack Query for server state, caching, and background sync in the LMS, cutting redundant and duplicate API calls by ~30% and keeping course, assessment, and analytics views responsive under load. - Improved Lighthouse performance on key LMS screens from ~64 to ~86 through code-splitting, memoization, image optimization, and render profiling. - Built a dynamic multi-level survey builder in Angular 16 with conditional logic, customizable workflows, and real-time preview. - Revamped the Survey Management App (part of the Venue Management System) to new designs and resolved Vue.js + Vuetify defects; cleared QA-reported issues on Smart Staff Selection; built the Non-Academic Survey analytics dashboard with cluster-based pie-chart reporting for the Ampersand Group.	Nov 2023 – Present
---	--------------------

Software Engineer

Jun 2021 – Sep 2023

BigBinary — Remote

React, Next.js, SCSS, Tailwind · Products: neetoCode, neetoKB, BigBinary Academy, Programa (client)

- **Programa** (Australian client, platform for design studios): translated Figma into a responsive UI across 10+ pages, built a reusable Sidebar component used platform-wide, optimized for mobile, and contributed to UX decisions alongside implementation.
- **neetoCode**: revamped the Home page, Communities page, and global header for the in-browser multi-language code editor (HTML/CSS/JS, React, Ruby, Python).
- **neetoKB**: unified the interface across three themes (Serene, Simple, Blue Sky) with code cleanup and new UI elements.
- **BigBinary Academy**: co-led a full website revamp in React and Next.js, translating Figma into a responsive, learning-focused interface; authored CSS curriculum exercises (sizing, spacing, backgrounds, borders).
- **BigBinary website & Lovewick**: enhanced the marketing site (service cards, header, footer, navigation, page-load times) and built the Lovewick app landing page from Figma to a pixel-perfect responsive UI, working component-driven with code reviews across a distributed team.

Software Engineer

Mar 2021 – May 2021

JAWK Softwares — Pune, India

- Transformed Zeplin designs into responsive, high-fidelity UI for InvestYadnya, a stock-market education platform; ensured cross-browser compatibility and mobile responsiveness.

Frontend UI Developer

Dec 2019 – Mar 2021

Webonise Pvt Ltd — Pune, India

- Built standards-compliant, responsive UIs for Taxsutra and Taxsutra Reservoir (a first-of-its-kind cross-publisher eBook platform for tax and legal professionals) using HTML5, SCSS, Bootstrap, and jQuery; collaborated with a Drupal/PHP backend on views, blocks, and components, and refreshed the company website for navigation and visual consistency.

Frontend UI Developer (Intern)

Apr 2018 – Feb 2019

Spidrontech LLP — Pune, India

- Built modern, responsive interfaces with Angular 6, HTML5, and CSS3 for two France-based marketplace platforms (Toquing, Colisdays), focusing on modular, maintainable components.

EDUCATION

Bachelor of Engineering, Computer Science — Anantrao Pawar College of Engineering & Research, Pune | 2014–2017

Diploma, Computer Science — Shri Chhatrapati Sambhajiraje Polytechnic, Pune | 2012–2014
